Select one of the 7 elements of digital literacy from above and outline how you would address it with your desired grade level and content area.

Grade: 1

Content area: Digital Literacy

Literacy element: Ethical use of digital resources- how not to plagiarize

Steps for introduction: I would start by reading the book *The Perfect Pet* by Margie Palatini then follow up with discussion on how their perfect pet look would look like. As we talk, I would show the students a visual model on a tablet of what my favorite pet would look like. Then ask them to create their own version of their favorite pet. I would then ask them how you would feel if someone copied your idea and I then used it as if they had created it. Then lead into how we can not copy and paste others' ideas from online and use them as our own. Talk about plagiarism in regards to digital art creations and literary works.
