Digital Literacy Pre-assessment 2

As I reflect on this question, I do feel that I lack knowledge in this area and could try to become more knowledgeable, especially on apps. I use various social media apps daily, google search, email, et all on a phone, computer, laptop using wi-fi. I have access to just about any electronic device someone would need to use to research, learn, or use for personal use. Once in a classroom I will need to think about my students and survey what they know and what they have access to. To create a level field of technology access to all my students.
